Spelling Pattern Exercises

our spelling pattern

1. You should know these words. If you make any mistakes please go over them to ensure your learning is secure.

2. These exercises are designed to test the spellings you have learnt, check your understanding and further enhance your vocabulary.

Exercise 1 – CLOZE test.

Fill in the missing letters to make the correct words.

My First Cookery Lesson

When I was **f _ _ _ t e e n** I **d e v _ _ _ e d** all the food my mother placed in front of me. Puddings were a **s _ _ _ c e** of pleasure and my **f a v _ _ _ i t e** was rhubarb pie. One day my parents went out shopping so I decided to cook one for myself. I picked rhubarb from the garden and mixed the **f l _ _ _** , butter, sugar and water with my fingers. The pastry was **d _ s c o l _ _ _ e d** because I had not washed my hands. I put the pie in the oven for an **h _ _ _** , which was too long. It was burnt! I ate it quickly before my parents returned. It was not a meal to **s a v _ _ _** . It would have given no **s u c c _ _ _** to a hungry man and the **f l _ v _ _ _** of burnt pastry is horrible. My parents returned and enquired about the **s _ _ _ c e** of the strange **o d _ _ _** in the kitchen. Luckily they have a sense of **h u m _ _ _** , and we all laughed. Mum made the pies from then on.

Exercise 2 – The words on the left are opposites of the words on the right. Complete the words on the right.

1. cowardice	v _ _ o _ r	2. sweet	s _ _ r
3. least-liked	_ a v _ _ r _ t_	4. cheerful	d _ u _

Exercise 3 – The words on the left mean the same or nearly the same as the words on the right. Complete the words on the right.

1. relish	s _ v _ _ r	2. exactness	_ i _ o _ r
3. smell	_ d _ _ r	4. origin	s _ _ r_ e

Exercise 4 – CLOZE sentences. Fill in the missing letters to complete each sentence.

1. I played in the tennis **t _ _ _ n a _ _ _ t**.
2. He was dazzled by the **g _ _ m _ u r**.
3. My **n _ i _ _ b _ _ r** threw my ball back over the fence.
4. There are lots of **t _ _ r i _ _ _** in Cornwall during the summer.
5. The baker used too much **f_ o _ _**.

Opposites 3 - Revision

You have learnt these harder words now do the following exercises.

What is the opposite of conceal? _____

What is the opposite of condemn? _____

What is the opposite of contract? _____

What is the opposite of damp? _____

What is the opposite of defeat? _____

Re-write these sentences using the opposite of the word in bold.

The prisoner was **confined**.

I can **confirm** that I was responsible for the attack.

The **hero** did not hide behind the rock.

The shape had a **height** of three metres.

The man was **drunk** when he left the pub.

Fill in the gaps on the right to find the opposite of the word on the left.

defend	a _____k
admit	d _ _ y
deep	sh _____ ow

SCORE:

If you didn't get them all correct please revise Opposites 3.

Homophones

Some words are pronounced like other words
but are different in spelling and meaning, e.g. knight and night

Tick off each word as you learn it please.

Stationery	Paper and writing materials for the office
Stationary	Standing still; static
Herd	A number of animals in a group, like cows or deer
Heard	Past tense of hear
Key	The tool that locks and unlocks a door, etc.
Quay	A man-made landing place for ships, another name for a wharf
Night	Time between evening and morning
Knight	A titled gentleman, like Sir Galahad
Muscle	Tissues in the body which contract or relax to create movement
Mussel	An edible shellfish
Place	A particular location; to put something somewhere
Plaice	A flat fish often eaten with chips!
Profit	A financial gain in business; to benefit from something
Prophet	One who foretells happenings
Sew	To work with needle and thread
Sow	To scatter or place seeds in the earth so plants will grow; a female pig
Stile	Steps built to allow people (but not animals) to get over a fence or wall
Style	Fashion; a characteristic manner or type
Vale	Another name for a valley
Veil	Thin material covering the face

Choose the correct word(s) to complete each sentence:

1. The bride was married in the church in the _____ and she wore a _____ made of pretty lace. **vale veil**
2. The van delivering _____ collided with a _____ car. **stationary stationery**
3. The _____ said there was no _____ in war with the Hebrews. **profit prophet**
4. In spring the farmers plough their fields and _____ the seed. **sow sew**
5. The striker pulled a _____ in his thigh so he had to leave the field. **muscle mussel**

Complete each sentence by using a suitable pair of homophones from the list above:

6. The thundering hoofs of the stampeding _____ could be _____ from afar.
7. The _____ to the sail locker was found on the _____ where the boat was moored.
8. The black _____ rode out one _____ to attack the baron's castle.
9. The fleeing poacher vaulted over the _____ in fine _____.
10. The fishmonger put the freshly-caught _____ in a prominent _____ on the marble slab.

You should learn these off by heart.

G. George Smith's school work for marking

Todays edishon of the local newspaper menshions that there will be an interuption to train services from our station because of necesary altorations. Construxion work will take a month, the report says.

My father and his neighber walk to the station and commoote to London every day. Now they will have to drive twelv miles to the next one. There is traffic conjestion on the roads, and there is also a rumor that the rale fairs are going up again.

"This is all very discurraging ." Says my father. He has lost his sense of houmour this morning, and the train company is definitly out of favur.

How many mistakes in spelling or grammar did you spot?

Paired Reading 3: Robinson Crusoe by Daniel Defoe

CHAPTER VII
-AGRICULTURAL EXPERIENCE-

I had now been in this unhappy island above ten months. All possibility of deliverance from this condition seemed to be entirely taken from me; and I firmly believe that no human shape had ever set foot upon that place. Having now secured my habitation, as I thought, fully to my mind, I had a great desire to make a more perfect discovery of the island, and to see what other productions I might find, which I yet knew nothing of.

It was on the 15th of July that I began to take a more particular survey of the island itself. I went up the creek first, where, as I hinted, I brought my rafts on shore. I found after I came about two miles up, that the tide did not flow any higher, and that it was no more than a little brook of running water, very fresh and good; but this being the dry season, there was hardly any water in some parts of it—at least not enough to run in any stream, so as it could be perceived. On the banks of this brook I found many pleasant savannahs or meadows, plain, smooth, and covered with grass; and on the rising parts of them, next to the higher grounds, where the water, as might be supposed, never overflowed, I found a great deal of tobacco, green, and growing to a great and very strong stalk. There were divers other plants, which I had no notion of or understanding about, that might, perhaps, have virtues of their own, which I could not find out. I searched for the cassava root, which the Indians, in all that climate, make their bread of, but I could find none. I saw large plants of aloes, but did not understand them. I saw several sugar-canes, but wild, and, for want of cultivation, imperfect. I contented myself with these discoveries for this time, and came back, musing with myself what course I might take to know the virtue and goodness of any of the fruits or plants which I should discover, but could bring it to no conclusion; for, in short, I had made so little observation while I was in the Brazils, that I knew little of the plants in the field; at least, very little that might serve to any purpose now in my distress.

The next day, the sixteenth, I went up the same way again; and after going something further than I had gone the day before, I found the brook and the savannahs cease, and the country become more woody than before. In this part I found different fruits, and particularly I found melons upon the ground, in great abundance, and grapes upon the trees. The vines had spread, indeed, over the trees, and the clusters of grapes were just now in their prime, very ripe and rich. This was a surprising discovery, and I was exceeding glad of them; but I was warned by my experience to eat sparingly of them; remembering that when I was

ashore in Barbary, the eating of grapes killed several of our Englishmen, who were slaves there, by throwing them into fluxes and fevers. But I found an excellent use for these grapes; and that was, to cure or dry them in the sun, and keep them as dried grapes or raisins are kept, which I thought would be, as indeed they were, wholesome and agreeable to eat when no grapes could be had.

I spent all that evening there, and went not back to my habitation; which, by the way, was the first night, as I might say, I had lain from home. In the night, I took my first contrivance, and got up in a tree, where I slept well; and the next morning proceeded upon my discovery; travelling nearly four miles, as I might judge by the length of the valley, keeping still due north, with a ridge of hills on the south and north side of me. At the end of this march I came to an opening where the country seemed to descend to the west; and a little spring of fresh water, which issued out of the side of the hill by me, ran the other way, that is, due east; and the country appeared so fresh, so green, so flourishing, everything being in a constant verdure or flourish of spring that it looked like a planted garden. I descended a little on the side of that delicious vale, surveying it with a secret kind of pleasure, though mixed with my other afflicting thoughts, to think that this was all my own; that I was king and lord of all this country indefensibly, and had a right of possession; and if I could convey it, I might have it in inheritance as completely as any lord of a manor in England. I saw here abundance of cocoa trees, orange, and lemon, and citron trees; but all wild, and very few bearing any fruit, at least not then. However, the green limes that I gathered were not only pleasant to eat, but very wholesome; and I mixed their juice afterwards with water, which made it very wholesome, and very cool and refreshing. I found now I had business enough to gather and carry home; and I resolved to lay up a store as well of grapes as limes and lemons, to furnish myself for the wet season, which I knew was approaching. In order to do this, I gathered a great heap of grapes in one place, a lesser heap in another place, and a great parcel of limes and lemons in another place; and taking a few of each with me, I travelled homewards; resolving to come again, and bring a bag or sack, or what I could make, to carry the rest home. Accordingly, having spent three days in this journey, I came home (so I must now call my tent and my cave); but before I got thither the grapes were spoiled; the richness of the fruit and the weight of the juice having broken them and bruised them, they were good for little or nothing; as to the limes, they were good, but I could bring but a few.

The next day, being the nineteenth, I went back, having made me two small bags to bring home my harvest; but I was surprised, when coming to my heap of grapes, which were so rich and fine when I gathered them, to find them all spread about, trod to pieces, and dragged about, some here, some there, and abundance eaten and devoured. By this I concluded there were some wild creatures thereabouts, which had done this; but what they were I knew not. However, as I found there was no laying them up on heaps, and no carrying them away in a sack, but that one way they would be destroyed, and the other way they would be crushed with their own

weight, I took another course; for I gathered a large quantity of the grapes, and hung upon the out-branches of the trees, that they might cure and dry in the sun; and as for the limes and lemons, I carried as many back as I could well stand under.

When I came home from this journey, I contemplated with great pleasure the fruitfulness of that valley, and the pleasantness of the situation; the security from storms on that side of the water, and the wood: and concluded that I had pitched upon a place to fix my abode which was by far the worst part of the country. Upon the whole, I began to consider of removing my habitation, and looking out for a place equally safe as where now I was situate, if possible, in that pleasant, fruitful part of the island.

This thought ran long in my head, and I was exceeding fond of it for some time, the pleasantness of the place tempting me; but when I came to a nearer view of it, I considered that I was now by the seaside, where it was at least possible that something might happen to my advantage, and, by the same ill fate that brought me hither might bring some other unhappy wretches to the same place; and though it was scarce probable that any such thing should ever happen, yet to enclose myself among the hills and woods in the centre of the island was to anticipate my bondage, and to render such an affair not only improbable, but impossible; and that therefore I ought not by any means to remove. However, I was so enamoured of this place, that I spent much of my time there for the whole of the remaining part of the month of July; and though upon second thoughts, I resolved not to remove, yet I built me a little kind of a bower, and surrounded it at a distance with a strong fence, being a double hedge, as high as I could reach, well staked and filled between with brushwood; and here I lay very secure, sometimes two or three nights together; always going over it with a ladder; so that I fancied now I had my country house and my sea-coast house; and this work took me up to the beginning of August.

I had but newly finished my fence, and began to enjoy my labour, when the rains came on, and made me stick close to my first habitation; for though I had made me a tent like the other, with a piece of a sail, and spread it very well, yet I had not the shelter of a hill to keep me from storms, nor a cave behind me to retreat into when the rains were extraordinary.

About the beginning of August, as I said, I had finished my bower, and began to enjoy myself. The 3rd of August, I found the grapes I had hung up perfectly dried, and, indeed, were excellent good raisins of the sun; so I began to take them down from the trees, and it was very happy that I did so, for the rains which followed would have spoiled them, and I had lost the best part of my winter food; for I had above two hundred large bunches of them. No sooner had I taken them all down, and carried the most of them home to my cave, than it began to rain; and from hence, which was the 14th of August, it rained, more or less, every day till the

middle of October; and sometimes so violently, that I could not stir out of my cave for several days.

In this season I was much surprised with the increase of my family; I had been concerned for the loss of one of my cats, who ran away from me, or, as I thought, had been dead, and I heard no more tidings of her till, to my astonishment, she came home about the end of August with three kittens. This was the more strange to me because, though I had killed a wild cat, as I called it, with my gun, yet I thought it was quite a different kind from our European cats; but the young cats were the same kind of house-breed as the old one; and both my cats being females, I thought it very strange. But from these three cats I afterwards came to be so pestered with cats that I was forced to kill them like vermin or wild beasts, and to drive them from my house as much as possible.

From the 14th of August to the 26th, incessant rain, so that I could not stir, and was now very careful not to be much wet. In this confinement, I began to be straitened for food: but venturing out twice, I one day killed a goat; and the last day, which was the 26th, found a very large tortoise, which was a treat to me, and my food was regulated thus: I ate a bunch of raisins for my breakfast; a piece of the goat's flesh, or of the turtle, for my dinner, broiled—for, to my great misfortune, I had no vessel to boil or stew anything; and two or three of the turtle's eggs for my supper.

During this confinement in my cover by the rain, I worked daily two or three hours at enlarging my cave, and by degrees worked it on towards one side, till I came to the outside of the hill, and made a door or way out, which came beyond my fence or wall; and so I came in and out this way. But I was not perfectly easy at lying so open; for, as I had managed myself before, I was in a perfect enclosure; whereas now I thought I lay exposed, and open for anything to come in upon me; and yet I could not perceive that there was any living thing to fear, the biggest creature that I had yet seen upon the island being a goat.

Sept. 30.—I was now come to the unhappy anniversary of my landing. I cast up the notches on my post, and found I had been on shore three hundred and sixty-five days. I kept this day as a solemn fast, setting it apart for religious exercise, prostrating myself on the ground with the most serious humiliation, confessing my sins to God, acknowledging His righteous judgments upon me, and praying to Him to have mercy on me through Jesus Christ; and not having tasted the least refreshment for twelve hours, even till the going down of the sun, I then ate a biscuit-cake and a bunch of grapes, and went to bed, finishing the day as I began it. I had all this time observed no Sabbath day; for as at first I had no sense of religion upon my mind, I had, after some time, omitted to distinguish the weeks, by making a longer notch than ordinary for the Sabbath day, and so did not really know what any of the days were; but now, having cast up the days as above, I found I had been there a year; so I divided it into weeks, and set apart every seventh day for a Sabbath; though I found at the end of my account I had lost a day or two in my reckoning. A little after this, my ink began to fail me, and so I

contented myself to use it more sparingly, and to write down only the most remarkable events of my life, without continuing a daily memorandum of other things.

The rainy season and the dry season began now to appear regular to me, and I learned to divide them so as to provide for them accordingly; but I bought all my experience before I had it, and this I am going to relate was one of the most discouraging experiments that I made.

I have mentioned that I had saved the few ears of barley and rice, which I had so surprisingly found spring up, as I thought, of themselves, and I believe there were about thirty stalks of rice, and about twenty of barley; and now I thought it a proper time to sow it, after the rains, the sun being in its southern position, going from me. Accordingly, I dug up a piece of ground as well as I could with my wooden spade, and dividing it into two parts, I sowed my grain; but as I was sowing, it casually occurred to my thoughts that I would not sow it all at first, because I did not know when was the proper time for it, so I sowed about two-thirds of the seed, leaving about a handful of each. It was a great comfort to me afterwards that I did so, for not one grain of what I sowed this time came to anything: for the dry months following, the earth having had no rain after the seed was sown, it had no moisture to assist its growth, and never came up at all till the wet season had come again, and then it grew as if it had been but newly sown. Finding my first seed did not grow, which I easily imagined was by the drought, I sought for a moister piece of ground to make another trial in, and I dug up a piece of ground near my new bower, and sowed the rest of my seed in February, a little before the vernal equinox; and this having the rainy months of March and April to water it, sprung up very pleasantly, and yielded a very good crop; but having part of the seed left only, and not daring to sow all that I had, I had but a small quantity at last, my whole crop not amounting to above half a peck of each kind. But by this experiment I was made master of my business, and knew exactly when the proper season was to sow, and that I might expect two seed-times and two harvests every year.

While this corn was growing I made a little discovery, which was of use to me afterwards. As soon as the rains were over, and the weather began to settle, which was about the month of November, I made a visit up the country to my bower, where, though I had not been some months, yet I found all things just as I left them. The circle or double hedge that I had made was not only firm and entire, but the stakes which I had cut out of some trees that grew thereabouts were all shot out and grown with long branches, as much as a willow-tree usually shoots the first year after lopping its head. I could not tell what tree to call it that these stakes were cut from. I was surprised, and yet very well pleased, to see the young trees grow; and I pruned them, and led them up to grow as much alike as I could; and it is scarce credible how beautiful a figure they grew into in three years; so that though the hedge made a circle of about twenty-five yards in diameter, yet the trees, for such I might now call them, soon covered it, and it was a complete shade,

sufficient to lodge under all the dry season. This made me resolve to cut some more stakes, and make me a hedge like this, in a semi-circle round my wall (I mean that of my first dwelling), which I did; and placing the trees or stakes in a double row, at about eight yards distance from my first fence, they grew presently, and were at first a fine cover to my habitation, and afterwards served for a defence also, as I shall observe in its order.

I found now that the seasons of the year might generally be divided, not into summer and winter, as in Europe, but into the rainy seasons and the dry seasons, which were generally thus:—The half of February, the whole of March, and the half of April—rainy, the sun being then on or near the equinox.

The half of April, the whole of May, June, and July, and the half of August—dry, the sun being then to the north of the line.

The half of August, the whole of September, and the half of October—rainy, the sun being then come back.

The half of October, the whole of November, December, and January, and the half of February—dry, the sun being then to the south of the line.

The rainy seasons sometimes held longer or shorter as the winds happened to blow, but this was the general observation I made. After I had found by experience the ill consequences of being abroad in the rain, I took care to furnish myself with provisions beforehand, that I might not be obliged to go out, and I sat within doors as much as possible during the wet months. This time I found much employment, and very suitable also to the time, for I found great occasion for many things which I had no way to furnish myself with but by hard labour and constant application; particularly I tried many ways to make myself a basket, but all the twigs I could get for the purpose proved so brittle that they would do nothing. It proved of excellent advantage to me now, that when I was a boy, I used to take great delight in standing at a basket-maker's, in the town where my father lived, to see them make their wicker-ware; and being, as boys usually are, very officious to help, and a great observer of the manner in which they worked those things, and sometimes lending a hand, I had by these means full knowledge of the methods of it, and I wanted nothing but the materials, when it came into my mind that the twigs of that tree from whence I cut my stakes that grew might possibly be as tough as the sallows, willows, and osiers in England, and I resolved to try. Accordingly, the next day I went to my country house, as I called it, and cutting some of the smaller twigs, I found them to my purpose as much as I could desire; whereupon I came the next time prepared with a hatchet to cut down a quantity, which I soon found, for there was great plenty of them. These I set up to dry within my circle or hedge, and when they were fit for use I carried them to my cave; and here, during the next season, I employed myself in making, as well as I could, a great many baskets, both to carry earth or to carry or lay up anything, as I had occasion; and though I did not finish them very handsomely, yet I made them sufficiently serviceable for my purpose; thus, afterwards, I took care never to be without them; and as my

wicker-ware decayed, I made more, especially strong, deep baskets to place my corn in, instead of sacks, when I should come to have any quantity of it.

Having mastered this difficulty, and employed a world of time about it, I bestirred myself to see, if possible, how to supply two wants. I had no vessels to hold anything that was liquid, except two runlets, which were almost full of rum, and some glass bottles—some of the common size, and others which were case bottles, square, for the holding of water, spirits, &c. I had not so much as a pot to boil anything, except a great kettle, which I saved out of the ship, and which was too big for such as I desired it—viz. to make broth, and stew a bit of meat by itself. The second thing I fain would have had was a tobacco-pipe, but it was impossible to me to make one; however, I found a contrivance for that, too, at last. I employed myself in planting my second rows of stakes or piles, and in this wicker-working all the summer or dry season, when another business took me up more time than it could be imagined I could spare.

Questions

The following words are all underlined in the text above:

Habitation **Discouraging** **Astonishment** **Abundance**
Contemplated **Distinguish**
Scarce **Exceeding**
Spoiled **Imperfect** **Musing** **Afflicting** **Confinement**
Improbable **Provisions**
Enlarging **Dwelling** **Humiliation**

1) In the boxes labelled A-E, write down a word from the box above which correctly matches the following definitions.

A		**the fact of living in a particular place/ environment**
B		**behaviour showing high moral standards**
C		**being embarrassed by someone**
D		**where you live**
E		**being greatly surprised**

2) **For the following five sentences, pick a word from the box above to complete the sentence so that it makes sense.**

Frankie had never _____ cheating in order to come first place.

They had been travelling in the desert for a week and water was _____ .

The prisoner hated being stuck in the_____ of his cell.

The charity needed an _____ of volunteer labour in order to carry on.

So far, all the results were _____ for Tony to pass his test.

3) **Using the clues given, unscramble the following anagrams to find a word from the box above.**

A) **pailbomber**

Clue: This means something is unlikely

B) **shadymelon**

Clue: Synonyms for this word include alluring, appealing and attractively

C) **singum**

Clue: This word means a period of reflection or thought

D) **angelring**

Clue: This word means the opposite to making something smaller/ shrinking

E) **clanfigfit**

Clue: something that is causing you pain

4) The following sentences all have a gap, choose a word from the box to fill the gap in the sentence. Write the sentence out correctly.

a) Hope knew she was her target grade in English.

b) They had packed enough for three weeks.

c) Helen knew she had the surprise by telling her friends.

d) The twins looked so alike it was hard to between them.

e) Aidan knew that everyone was .

Revision Anagrams – Jumbled Letters

- This exercise uses words you have recently learnt.
- Use the clues to help you sort the letters out to find the answer.
- If you are not sure of a word (spelling or meaning) add it to your own personal vocabulary list.

Question	Clue	Answer
1. ruboar	An area shaded by trees.	
2. ovalfur	The taste of something.	
3. roumur	A statement that may or may not be true.	
4. lyourh	Every sixty minutes.	
5. doour	A smell.	
6. moaningatii	The ability to create mental images.	
7. sanityorat	Not moving; standing still.	
8. redh	Sounds like heard. A group of animals such as elephants.	
9. kithgn	A type of soldier.	
10. lessmu	A type of mollusc that people eat. Sounds like muscle.	
11. licepa	A type of fish. Sounds like place.	
12. hotprep	A person who speaks by divine inspiration.	
13. muhour	Amusement.	
14. attorneyis	Office materials.	
15. yelts	The way in which something is said, done or performed.

15. Sounds like key, a place for ships to dock.
16. One more than thirteen.

Synonyms Test

Some of these words will be new to you. Try to find as many as you can. This test includes two styles of question.

Section 1

Fill in the blanks in the word on the right so that it has a **similar meaning** to the word on the left.

gallant	c _ i _ _ l _ o _ s
unbeatable	i _ v _ _ c i _ _ e
foreign	a l _ _ _
desire	a s p _ _ _
series	s e _ u _ _ _ e

Section 2

Choose the word on the right which is **most similar** in meaning to the word on the left.

myriad	measure	limited	countless	muddy
impending	intentional	probable	possible	imminent
enthusiasm	elation	penitence	fervour	hysteria
elementary	first	initial	divided	basic
refrain	provide	retain	prevent	abstain

ST2

Excalibur and the Sword in the Stone

In Arthurian legend there are two famous swords. One is called Excalibur and the other is the Sword in the Stone. Some people believe these swords are one and the same, but others think they are quite different.

The Sword in the Stone

The legend of the Sword in the Stone is about how Arthur made his true claim to the throne of Britain. The sword belonged to Uther, the High King of Britain. When Uther died there was no known heir, so all the barons started fighting each other over who was to be the next king. Merlin, the magician, has an idea. Using his powers he thrusts the sword deep into a huge granite rock.
"The man who is able to draw this sword out of this mighty rock", he proclaims, "will be the rightful heir to the kingdom. Let this be known so that all who make a claim may have their chance to prove their birthright."
Following this announcement many knights come forward confident of their ability to extract the sword from the rock. Try as they might – Uriens, Lot, Leodegrance and many others, none of them has the strength to move the sword, rigid in its rock.
A few days later, Sir Ector and his young sons Arthur and Kay pass by. In fact Arthur is Sir Ector's foster son although he does not know this. Kay has recently broken his sword, and seeing the sword in the rock, he tries to draw it out. He fails, but then Arthur tries, and, as if by magic, the sword is freed from the rock. Then Merlin makes his entrance again and declares that Arthur is Uther's true son. To prove it he places the sword back in the stone and dares anyone to draw it. Again no one succeeds but Arthur. And so he became High King of Britain at a very young age.

Excalibur

The legend of Excalibur regards a lady, a lake, and a mysterious hand.
King Arthur's first sword has broken, so Merlin directs him to a lake, where they meet the Lady of the Lake. She points, and they witness, in the middle of the lake, a hand rising out of the water holding a beautiful sword, dripping and shining in the sunlight.
The Lady of the Lake informs Arthur that the sword belongs to her and it is called Excalibur. She offers the sword to Arthur in return for a gift. Arthur accepts the offer and he and Merlin row out to the middle of the lake. Arthur takes the sword from the hand and holds it high.
As they row back to the lakeside, they see the hand slowly sink back into the water, leaving only a dying ripple.

Now answer the questions on the next page (answers below)

1. Why are the barons fighting each other?

2. How is Merlin able to thrust the sword into the rock?

3. Which of these is a birthright?
    a. The day on which one is born.
    b. A brown mark on the skin at birth.
    c. A privilege or possession to which one is entitled by birth.
4. Why are Uriens and the other knights unable to extract the sword?
    a. Because they are not strong enough.
    b. Because the sword is firmly stuck.
    c. Because they are not the true heirs.
5. Who is Arthur's true father?

6. How is this demonstrated?

7. Why is Excalibur 'dripping'?
    a. Because it is bloody.
    b. Because it is wet.
    c. Because the sun is reflecting on the lake.
8. What does the Lady of the Lake receive for Excalibur?

9. How does Arthur get to the middle of the lake?
    a. In a rowing boat
    b. By canoe
    c. He swims
10. Why do you think the ripple is described as 'dying'?

Christopher Columbus

Use the words below to fill in the blanks.
Use each word once- you will need to adjust if you go wrong, you must only use each word once.

planned	through	even	would	lived	company	voyage	stuck
several	visited	discovery	explorer	whose	attacked	entered	Queen

Spelling Letter Patterns

Exercise 1

When I was **FOURTEEN** I **DEVOURED** all the food my mother placed in front of me. Puddings were a **SOURCE** of pleasure and my **FAVOURITE** was rhubarb pie. One day my parents went out shopping so I decided to cook one for myself. I picked rhubarb from the garden and mixed the **FLOUR** , butter, sugar and water with my fingers. The pastry was **DISCOLOURED** because I had not washed my hands. I put the pie in the oven for an **HOUR**, which was too long. It was burnt! I ate it quickly before my parents returned. It was not a meal to **SAVOUR**. It would have given no **SUCCOUR** to a hungry man and the **FLAVOUR** of burnt pastry is horrible. My parents returned and enquired about the **SOURCE** of the strange **ODOUR** in the kitchen. Luckily they have a sense of **HUMOUR**, and we all laughed. Mum made the pies from then on.
