Spot the Mistakes - Maths

- **Susan has completed her Mental Maths task but unfortunately she's made a number of mistakes. Her answers are underlined.**
- **Circle the mistakes. See if you can work out what she might have done wrong.**

① 3 x 9 + 6 = 33

② 9cm 4mm= 94 mm

③ (18 ÷ 3) – (16 ÷ 4) = 2

④ 1 h 50 min = 110 min

⑤ Write as £'s the sum of 26p, 28p and 50p = 104

⑥ Subtract 36p from £1 = 74

⑦ $^1/_5$ of £25 and $^1/_7$ of £7 = £6

⑧ £1 - 47p = 53p

⑨ (7 x 8) + 7 = 55

⑩ By how many g is 820g less than 1kg

180 g

⑪ How many min from 7.47am to 8.15am

29 min

⑫ Find the difference between

7 x 9 and 9 x 6 = 27

Marks /

Mental Mathematics

Try the following questions. Do as many in your head as possible.

① 16km - 10.7km = _____ m

② 213min = ____ h ____ min

③ 250ml x 9 = _____ l

④ 6000 + 8 + _____ + 90 = 6998

⑤ (0.2 of £1) + (0.02 of £1) = _____ p

⑥ 998 x 4 = _____

⑦ £5 - £ _____ = £1.63

⑧ 4.17 x 100 = _____

⑨ 45p + 18p + 27p = _____ p

⑩ 3.06 ÷ 6 = _____

⑪ Multiply £4.08 by 6 and write the answer to the nearest £. £ _____

⑫ Change 1260p to £. £ _____

⑬ How many pennies are 10 TWOS less than 8 FIVES? _____

⑭ Subtract 0.06 from 0.3. _____

⑮ Add 7^2 to 3^2. _____

⑯ Find the average of 4, 5, 6, 7 and 8. _____

⑰ 400ml cost 48p. Find the cost of 2 litres £ _____

⑱ What fraction of 1 hour is 24min? _____

⑲ Find the difference between (3/8 + 5/8) and 6. _____

⑳ Divide the sum of £5.10 and £1.70 by 8. _____ p

Marks /20

Mathematics Revision Test 4

1. $\frac{42}{6}$ = _____

2. $\frac{42}{7}$ = _____

3. 6^2 = _____

4. $3^2 + 6^2$ = _____

5. 42 ÷ 7 = _____

6. 63 ÷ 9 = _____

7. 12 ÷ 2 = _____

8. 8 x 9 = _____

9. 7 x 12 = _____

10. 12 x 7 = _____

1. 8 x 4 = _____

2. 72 ÷ 12 = _____

13. 56 ÷ 7 = _____

14. 9 x 4 = _____

15. $\frac{36}{4}$ = _____

16. $\frac{30}{6}$ = _____

17. $\frac{72}{12}$ = _____

18. 5 x 9 = _____

19. 45 ÷ 9 = _____

20. 56 ÷ 7 = _____

Finding an Average

The table below shows the pupils who entered a skipping contest. Have you tried skipping? I used to love it!

Name	First try	Second try	Third Try
Ann	**45**	**28**	**23**
William	37	36	29
David	18	42	39
Mike	29	53	26
Ruth	36	37	59
Terry	51	26	40

Ann had a total of 96 skips. If you divide this total by 3, you will get the average number of skips she made on each try.

45
28 +
23
96 Ann's average ⟶ **96 ÷ 3 = 32** ✓

1. What was William's average?

2. What was Ruth's average?

3. Find the average number of skips for the first try.

4. Find the average number of skips for the second try.

5. Who had the higher average, David or Terry?
   How much higher?

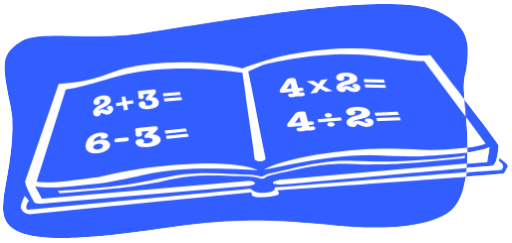
6. Who had:
   a) The highest average?
   b) The lowest average?

Answers are on the following sheet.
Average is easy if you can add and divide!

Fractions Exercise 2

To find $\frac{3}{4}$ of 12, you need to find $\frac{1}{4}$ of 12 first. To find $\frac{1}{4}$ of 12 you divide by 4 so $\frac{1}{4}$ of 12 = 3. If $\frac{1}{4}$ of 12 = 3 then $\frac{3}{4}$ of 12 is = 9.

Now try these.



$\frac{1}{6}$ of 36 =

$\frac{1}{2}$ of 62 =

$\frac{1}{6}$ of 12 =

$\frac{1}{5}$ of 65 =

$\frac{5}{6}$ of 30 =

$\frac{4}{5}$ of 40 =

$\frac{4}{5}$ of 50 =

$\frac{2}{5}$ of 50 =

$\frac{1}{8}$ of 56 =

$\frac{3}{8}$ of 88 =

$\frac{2}{3}$ of 90 =

$\frac{3}{4}$ of 32 =

$\frac{5}{6}$ of 18 =

$\frac{7}{1}$ of 40 =

$\frac{4}{5}$ of 100 =

$\frac{3}{8}$ of 56 =

$\frac{3}{4}$ of 48 =

$\frac{9}{1}$ of 30 =

$\frac{1}{8}$ of 24 =

$\frac{7}{1}$ of 50 =

Maths

Spot the mistakes

⑤ Answer should be £1.04. Despite doing the core sum correctly Susan has not read the question and not given her answer in £'s.

⑥ The answer should be 64p. This is a common type of error. In this case a child might be thinking take away 30p from £1 = 70p, take away 6p from 10p = 4p but not relating the two correctly. Once they realise they make this mistake and focus on it then improvement occurs.

⑨ The correct answer is 63. This is either an indication that times tables need to be much stronger (work needed or mistakes like this will continue) or the child has not approached the question correctly.

⑪ The correct answer is 28 minutes. A common mistake is to count 7.47am as the first minute whereas counting should start at 7.48am. The question is <u>from</u> 7.47am <u>to</u> 8.15am.

⑫ The correct answer is 9 (difference between 63 and 54). This is an error in times tables or in approaching these types of questions.

Mental Maths

1) 5300m

2) 3h 33min

3) 2.25 litres

4) 900

5) 22p

6) 3992

7) £3.37

8) 417

9) 90p

10) 0.51

11) £24

12) £12.60

13) 20

14) 0.24

15) 58

16) 6

17) £2.40

Average

You will need to work out the averages for the 6 children first.

Then you can find your answers.

1. 34
2. 44
3. 36
4. 37
1. Terry / 6 (David = 33, Terry = 39)
2. Ruth / Ann

Fractions

(Numbering taken as left to right, top to bottom)

1) 6
2) 60
3) 31
4) 24
5) 2
6) 15
7) 13
8) 28
9) 25
10) 80
11) 32
12) 21
13) 40
14) 36
15) 20
16) 27
17) 7
18) 3
19) 33
20) 35

Maths Reasoning

- Pages 1-9 have 1 digit.

The first 9 pages have 1 digit, so the first 9 pages contain 9 digits.

- Pages 10-99 have 2 digits.

The next 90 pages have 2 digits, so the next 90 pages contain 180 digits.

The number of digits left is:

$$666 - 180 - 9 = 477$$

- Pages 100+ have 3 digits.

So, the number of 3 digit pages is:

$$477 \div 3 = 159$$

The total number of pages is:

$$9 + 90 + 159 = 258$$
