Section 3

In the example below there are five figures. One of these figures is **most unlike** the other four and its letter has been marked on your answer sheet.

Example

Answer: B

In this example, all the figures are white except for the black circle. Therefore **B** is the correct answer as it is the only one of the five figures that is unlike the others.

Now do the two practice questions below.

P1

In this question, all the figures have five sides except for option **C** which has four sides.

P2

In this question, all the arrows (irrespective of their line style or fill) are pointing upwards except for option **D** which is pointing downwards.
