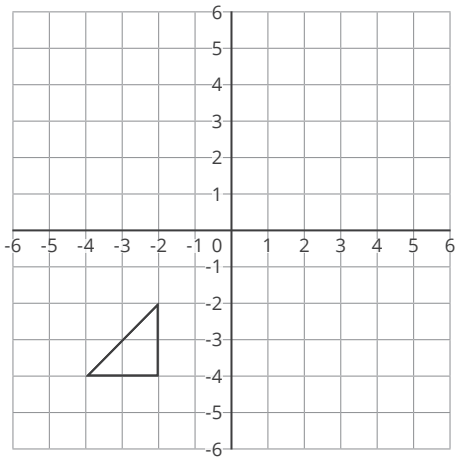
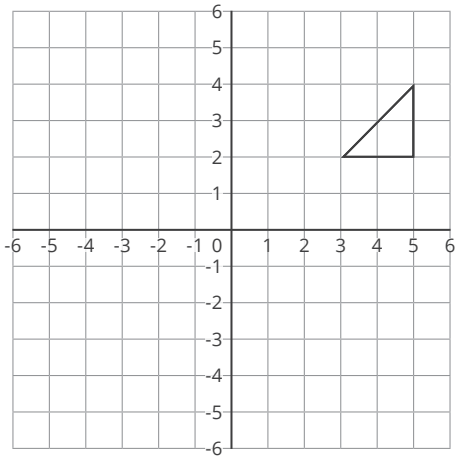
Mixed Transformations

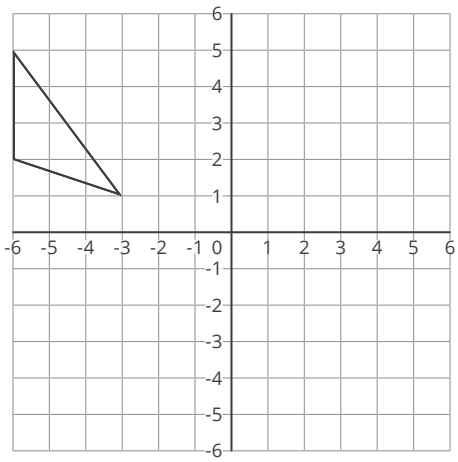
1. Enlarge the triangle by a scale factor 3, using (-5, -5) as the centre of enlargement.



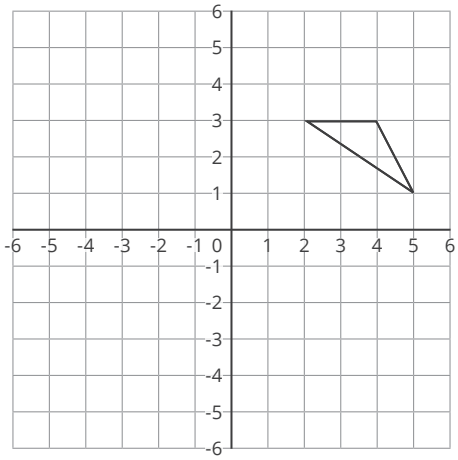
2. Rotate the triangle through 180°, using (0, 0) as the centre of rotation.



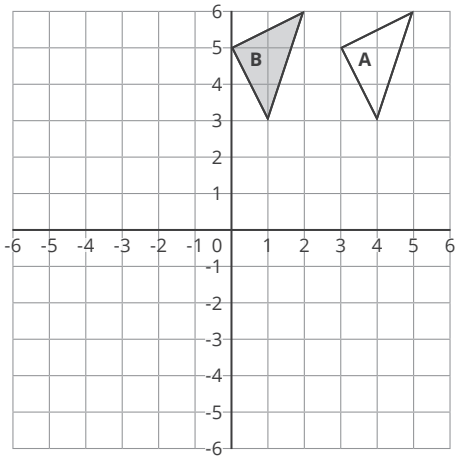
3. Translate the triangle, using the vector $\begin{pmatrix} 4 \\ -2 \end{pmatrix}$.



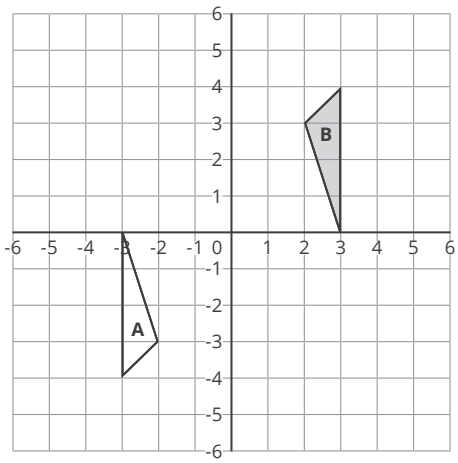
4. Reflect the triangle in the line $y = -x$.



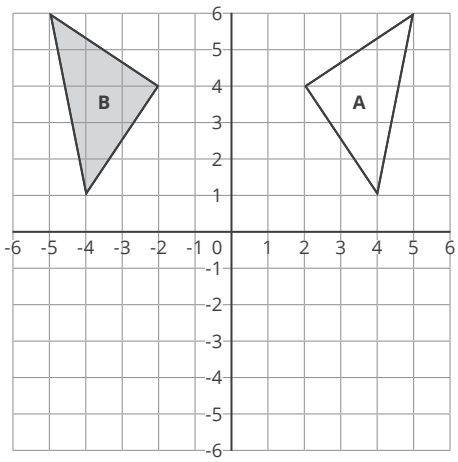
5. Describe fully the transformation which maps triangle A onto triangle B.

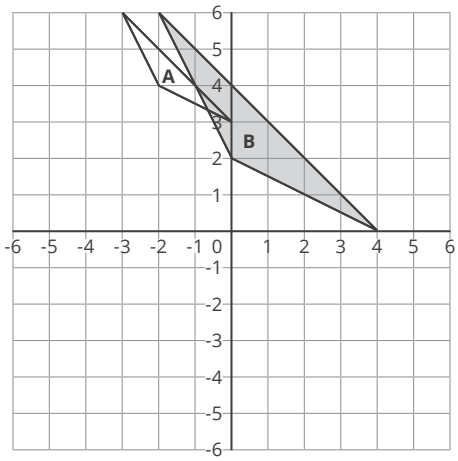


6. Describe fully the transformation which maps triangle A onto triangle B.



7. Describe fully the transformation which maps triangle A onto triangle B.





8. Describe fully the transformation which maps triangle A onto triangle B.
