Non-Verbal Reasoning

1. LIKE SHAPES / TYPE 1

Example

Explanation

There is no change in the large shape from the first set of shapes to the second. However the shape that is behind the larger moves to the front and the other shape that is in front moves behind.

Non-Verbal Reasoning

2. ODD ONE OUT / TYPE 2

Example

Explanation

Answers A, B, C and D all start with a black shape on top then alternate between dotted and black. But E starts with a dotted shape then alternates between black and dotted.

Non-Verbal Reasoning

3. ROTATIONS / TYPE 3

Example

Explanation

Only one of the answers is a rotation of the original. D is the only possible answer as it is the only hand with the thumb still on the left hand side. The lines also go from the bottom left of the hand to the top right.

Non-Verbal Reasoning

Like Shapes

1. **D** - (The half shape is reflected to form a whole shape, but the colours in the new half have changed from white to black and black to white.)
2. **B** - (The outer shape is rotated 180 degrees while the inside shape remains the same. One of the vertical lines is then taken away.)
3. **C** - (The inside black shape that is attached to the line becomes the large outer white shape and the outer shape shrinks and becomes the small black shape attached to the line inside.)
4. **D** - (The front shape shrinks in size so that it fits inside the shape behind it.)

Odd One Out

1. **A** - (There are two differences that A has. Firstly, it is the only shape with an arrow with two heads. It is also the only shape where the arrow isn't vertical.)
2. **A** - (All the shapes have the same number of stars as the number of sides of the large shape except A which has 8 sides and only 7 stars.)
3. **D** - (There are the same number of dashed lines as pentagons in all except D which has 3 dashed lines and 4 pentagons.)
4. **D** - (All of the answers have three diamonds in, regardless of colour, except for D which only has one.)

Rotations

1. **C** - (C is a rotation of around 45 degrees clockwise of the original.)
2. **C** - (C is a rotation of 180 degrees of the original.)
3. **C** - (C is a rotation of 90 degrees clockwise of the original.)
4. **E** - (E is a rotation of 90 degrees clockwise of the original.)
